NGUYỄN ĐĂNG HÙNG

GAME DEVELOPER & DESIGNER

PROFILE

A hybrid Game Developer and Designer specializing in gameplay systems and performance optimization for mobile games. My expertise lies in architecting compelling player experiences—from intricate skill systems to challenging AI —and then engineering the efficient, optimized code required to make them run flawlessly. I am dedicated to creating memorable games that are as technically sound as they are fun to play.

WORK EXPERIENCE

- Imba Games Studio2022 - PRESENT  
Game Developer & Designer  
  
A key hybrid developer and designer contributing across the entire lifecycle of multiple successful mobile titles. Proven ability to architect core gameplay systems, implement high-performance code, and lead design initiatives.
  - Stepped into a Lead Designer role for the latest project, Samkok Heroes TD, architecting all core gameplay, progression, and monetization systems from concept.
  - Designed and balanced intricate gameplay systems, including character skills, AI behaviors, and combat mechanics
  - Implemented core gameplay features, UI, and custom VFX using Unity/C#, ensuring a high-quality, engaging player experience.
  - Consistently optimized game performance to maintain a stable 60-FPS on a wide range of mobile devices, utilizing techniques like object pooling.Projects:
  - Lead Designer: Samkok Heroes TD
  - Shipped Titles: Dynasty Archer, Archer Hunter, Heroes Survivors, Overleague
- Innovation Factory2017 - 2018  
Japanese Translator
  - Provided interpretation services for in-person and video conferences, ensuring the original style, tone, meaning, and intent were maintained.
  - Proofread and copy-edited Vietnamese and Japanese documents, correcting spelling, grammatical, and typographical errors.
